

## **New FilSpec™ product now available**

**Sherbrooke, May 31<sup>st</sup>, 2018** - The FilSpec™ team was at Techtextil North America in Atlanta from May 22<sup>nd</sup> to 24<sup>th</sup> to introduce **WorkFil™**, a new yarn that offers workers versatility, comfort and protection.

### **Products unveiled in exclusivity**

WorkFil™ is a yarn created and designed to provide workers with a comfortable, resistant, safe and professional uniform. The yarn is available in two options: WorkFil™ FR (Flame Resistant) and WorkFil™ TR (Tear Resistant).

Fabrics created with WorkFil™ are similar to denim that can be dyed in the company's chosen color. We can therefore manufacture a variety of protective uniforms for workers in all fields (delivery, construction, welding, electricity, production lines, mechanics, etc.).

The fabric has been tested in CTT Group laboratories and has passed NFPA 2112-2012 tests for fabric, certifying its flame resistance. You can [view the WorkFil FR burn test](#) on our website.

*«WorkFil™ is an innovation in the field because of its versatility. Finally, we can create fabrics offering high protection without compromising comfort and style, since the fabric can be dyed in different colors.»* explains Eric Perlinger, FilSpec's President. For more information we invite you to visit the [WorkFil Product page](#) on our website.

### **Making a difference in the intelligent textile industry**

Since its beginnings, FilSpec™ has relied on innovation to stand out and offer ingenious solutions that compete with existing products. The technical textile yarn manufacturing company is constantly investing in research and development. It's also active in several countries throughout the world to offer innovative, high performance and superior quality intelligent yarns and textiles which meet a variety of needs (cut resistant, flame resistant, comfort, anti-odor, UV protection, etc.).

### **About FilSpec**

FilSpec™ has been an ever-evolving Canadian spinning company since 1954. In recent years, the company has constantly adapted to customer's needs by focusing on the manufacture of innovative technical yarns. This has enabled it to maintain its leading position for over 50 years.

FilSpec™ manufactures specialty textile yarns from natural, artificial and synthetic fibres and cooperates with manufacturers in the military, industrial, medical, sports fields and more.
